Providing Solutions to Help Business Grow

Business Advice & Solutions and the BA&S Network provide advanced solutions that help businesses and individuals succeed in today's ever-changing world. Our solutions are designed to make life easier, more efficient, and more productive.

Who We Are

Welcome to Business Advice and Solutions LLC, your trusted partner for business success in Delavan, WI since 2018. Specializing in expert advice and tailored solutions, our seasoned team caters to small and medium-sized companies in Northern Illinois and Southern Wisconsin. Our focus on small business development sets us apart, covering diverse industries such as Manufacturing, Hospitality, Healthcare, and HR.

Six Sigma Trainings we offer

- **YELLOW BELT TRAINING**- awareness training - useful if there is greenbelt training going on.
- **GREEN BELTRAINING (Certificate of completion)** - only the classes, no certification
- **DMAIC GREEN BELT TRAINING & CERTIFICATION** - Classes with a path for a DMAIC certification: project plus mentoring.

Overview

Yellow Belt Training

Is a professional accreditation that signifies an individual's proficiency in the foundational elements of the Six Sigma methodology. This certification equips professionals with the skills to support process improvement initiatives within an organization.

In essence, a Yellow Belt certification is not just a personal achievement; it's a strategic investment for organizations aiming for excellence in quality and efficiency.

Green Belt certification

Is a distinguished level of training in the Six Sigma methodology, empowering professionals with advanced problem-solving, process improvement, and project management skills. Green Belts are adept at bridging the gap between Six Sigma theory and practical application, making them invaluable assets in any organization. Here's why organizations should consider Green Belt certification.

In short, Green Belt certification is essential for organizations aiming to excel in quality management and operational excellence. It not only equips individuals with the tools to make significant contributions but also drives the organization towards a culture of continuous improvement and customer-centricity.

Master Efficiency: Get Green Belt Certified, Get Ahead!

Lean Manufacturing

Lean Manufacturing and Green Belt Certifications are two pillars that support an organization's journey towards operational excellence.

When combined, Lean Manufacturing and Green Belt Certifications create a powerful synergy:

- **Efficiency & Quality:** Lean principles reduce waste, and Six Sigma reduces variation, which together enhance efficiency and quality.
- **Cost Savings:** Lean helps cut unnecessary costs, while Green Belt projects can lead to significant financial savings by improving processes.
- **Employee Empowerment:** Training in both methodologies empowers employees to identify and solve problems, fostering a proactive workplace culture.
- **Customer Satisfaction:** The end result of Lean and Six Sigma is higher quality products and services, which lead to happier customers.

Organizations that adopt both Lean Manufacturing and Green Belt Certifications are not just improving their processes; they are building a culture of continuous improvement that can adapt to changes and challenges, ensuring long-term success and sustainability.

It's a path that leads to a leaner, more agile, and more profitable organization.
